

Dear Mr. Buchanan,

I would like to ask You behalf the executive comitee of the organization *Association of Young Right (Mladá pravice)* to become honourable member of our organization.

*Association of Young Right* supports the opinion, that the representative democracy can work only in the nation state, and therefore considers the assignment of the competences of sovereign state on the European institutions to be bad. We oppose vitally against the effort to build the united European super-state, driven by the bureaucratic elites. Our organization emphasizes the wider contexts of the present European issues, such as growth of the dangerous phenomena like radical feminism, ecologism, social engineering, homosexuality, NGOism, antiamericanism, political correctness and multiculturalism. Our motto is „*Europe of the free nations, nation states of the free citizens*“.

Our credo was deeply inspired by Your friend Ronald *Gipper* Reagan and his friend Margaret Thatcher as well as Edmund Burke, Benjamin Disraeli, W. Churchill, Robert Nisbet, Roger Scruton, John ´O Sullivan, Enoch Powell and our friend and Czech president Václav Klaus to name a few (and of course by You).

I believe that member of our executive committee and Your friend Marek has told You more about our organization.

We deeply appreciate that You still stay Your ground and that You fight in cultural war to save Your nation a and free nations of Western civilization.

If You accept our offer, we shall be very complimented by Your goodwill.

With greetings *God bless You, God bless America and God bless Dixie!*

Lukáš Petřík

President of the *Association of Young Right*
